

Spiritual Debriefing

A. Grosshauser, MC Consultant

Consider the spiritual atmosphere, predominant values and practices as well as personal encounters

- Islam- e.g. devaluing women, abusing children; concept of shame and honour
- communism- people have often ungodly values, atheistic mind-set;
- Animism – fear of spirit world and practices;
- practices workers have come into contact > what has challenged or worried them, do they experience hopelessness, nightmares, spiritual dryness, etc.
- Sometimes workers have brought items into their living place that are occult and have an effect on them, not being aware of it.
- Living in a local home or in a joint compound always needs prayer of protection and cleansing.
